Antti Viitala

- 🇭🇰 Hong Kong based (PR) | 🇫🇮 Finnish citizen
- Well-rounded engineer focused on devops, CI/CD and cloud infrastructure
- Lead Infra & DevOps at Synpulse8 and support multiple projects and internal products working primarily with AWS, Kubernetes, GitHub Actions, JFrog and SonarCloud
- ~5 years of experience within consulting for financial services
- Experienced and fluent at working with stakeholders of all levels across business and technology
- Effective and driven learner, able to take new topics/technologies to a working level very quickly

Key skills, interests & personal projects

- **Cloud providers:** AWS | Azure | GCP (basics only)
- **Tech platforms and tools:** GitHub Actions | Docker | Kubernetes | JFrog | Atlassian (Jira/Confluence) | Jenkins
- **Programming languages/frameworks:**
  - Strong: Python | Terraform | Bash/Shell | YAML | TOML
  - Basic: Golang | HTML/CSS/JS | Svelte/SvelteKit | VBA | DAML
- **Languages:** English 🇬🇧 | Finnish 🇫🇮
- **Personal projects**: See my projects page for more information
- **Open-Source contributions**: See contributions to open-source projects for more information
- **Other interests:** Ultra running 🏃 | Swimming 🏊 | Esports/FPS 🔫 | Electric guitar🎸

With Kubernetes I have experience primarily with AKS and EKS, though I have also set up and ran simpler workloads on GCP GKE and Linode LKE. Some of the applications I have configured and have familiarity with are kubernetes-autoscaler, nginx-ingress, cert-manager, external-dns with Azure DNS, oauth2-proxy with Azure and GitHub providers, redis, loki-stack, prometheus-stack and kubernetes-dashboard. For cluster management I'm a huge fan of K9S.

Work experience & education

🇭🇰 **Synpulse8 (S8)** [03-2021 - Present]

Solution Architect (Vice President) - Devops, CI/CD, cloud, system design & software development

- Devops and infra-as-code for a mobile application with a CMS API backend (AWS App Runner / Aurora / WAF / ECR / S3 etc. managed via Terraform, GitHub Actions, JavaScript)
- Devops and infra-as-code for several microservices-based financial applications (primarily using AWS EKS / AWS Aurora DBs / S3 etc. managed via Terraform and Kubernetes, GitHub Actions)
- Devops and infra-as-code for a financial-services focused risk analytics visualization app (Azure/AWS, AKS/EKS, GitHub Actions, front: React / back: Spring, Apache Pinot,

Terraform, Airflow)
- Set up, administration and operation of our CI/CD pipelines and cloud infra, for example our internal product development clusters (Azure, Kubernetes, GitHub Actions, JFrog)
- S8 Operating model definition: devops, tech stack (incl. licensing), architecture principles, security policies
- Infra, architecture and development of a DAML-based collateral management system MVP
- Various internal initiatives: creating websites/portals/webapps with e.g. Hugo and Azure Static Web Apps
